Project in Prod

Lucky Link

An "eventbrite-like" website to connect French private firms to local NGOs. It aims to build partnerships in leading public health campaigns and allow NGOs to manage their projects and receive notifications on their evolution. Lucky Link is the validating group project for The Hacking Project, it is 94% test-covered.

This project is private. The repo is on demand.

Also **contribute to the translation of Kubernetes docs** from English to French.

Previous Experiences

Two-year experience in **management control/FP&A in international environment.** Familiar with sectors such as publishing, insurance, real estate and logistics. Fluent in **English, French and Mandarin.** Worked with **Excel** and Power BI, basic knowledge on **Python** and **SQL**, interest in Neo4j.

Performance monitoring: Followed business performance on a regular basis from daily to annually, analyzed performance evolutions, elaborated recommandations.

Financial planning: Prepared annual budget according historical indicators, produced quantitative and qualitative financial and operational reportings for inner and executive use.

Profitability studies: Evaluated investment opportunities based on hypothesis and formulated investiment recommandations.

Workshop animation: Organized brainstorming sessions to help NGOs and young businesses in social and solidarity (ESS) economy to diagnose and overcome specific challenges.

Pastime

Theater, museum and galery, salon and folk dance, handcraft, volunteering
